## Hybrid Offices: The Future Of Work

*With more employees splitting their time between working in-office and from home, smart, adaptable office spaces are redefining flexible work.*

### Workspace Allocation

Employees can use OpenBlue Companion to choose their desk for the day and reserve a locker to store their belongings. Digitally controlled conference rooms bridge physical and virtual meetings so everyone is comfortable and productive.

### Air Quality

Throughout the facility, OpenBlue Enterprise Manager monitors air quality and displays it on dashboards. Operations staff make the most of digital controls with customized reports.

### Touchless Technology

Digital tools support safety and wellness as well as convenience. With OpenBlue Companion, employees can badge in with their phone and use the app to control workspace temperature and lighting, avoiding touching common surfaces.
